INTRODUCTION

This bibliography lists all Technical Reports prepared by the Woods Hole Oceanographic Institution in the year 1976. It includes an author index, and also a key relating Reports to "Contribution Numbers". Many of the Reports appear in this dual role, which means that they are available in published literature. When including a Report in a bibliography the published reference should be the preferred form.

NTIS numbers are provided as far as known, whereby the Reports may be ordered in papercover or microfiche format from the National Technical Information Service, Springfield, Virginia 22161. Any routine distribution of the Reports is controlled by the fund-granting agencies, and is rather limited. Consequently the NTIS availability makes acquisition possible for wider use, regardless of the primary distribution.

The Document Library does not regularly maintain supplies of Reports, which remain in the custody of the authors. However, copies are acquired occasionally and these are held for inquiries that may come in. The Document Library may be addressed for Interlibrary Loans, or regarding problems of local identification and availability.
